Overview

As an IPO adviser to companies and underwriters, we surveyed corporate governance practices in recent U.S.-listed IPOs to identify current market trends. We focused on the top 50 IPOs of “controlled companies” (as defined under NYSE or NASDAQ listing standards) and the top 50 IPOs of non-controlled companies, in each case based on deal size from November 1, 2013 through March 31, 2016.*

Because controlled companies are exempt from certain NYSE and NASDAQ governance requirements, we examined corporate governance practices at these companies separately from those at non-controlled companies. The survey results below focus on non-controlled companies, whose deal size ranged from $158.4 million to $3.4 billion. For our survey focusing on controlled companies, please see here.

The Companies

We examined the following 50 non-controlled companies, spanning 25 industries:

- A10 Networks, Inc.
- Advanced Drainage Systems, Inc.
- Aimmune Therapeutics, Inc.*
- Ally Financial Inc.*
- Arista Networks, Inc.
- BeiGene, Ltd.*
- Bellicum Pharmaceuticals, Inc.
- Blueprint Medicines Corporation
- Box, Inc.
- Castlight Health, Inc.
- Chegg, Inc.*
- Citizens Financial Group, Inc.*
- Coupons.com Incorporated
- Etsy, Inc.*
- FCB Financial Holdings, Inc.
- FibroGen, Inc.
- Fitbit, Inc.
- FMSA Holdings Inc.
- Fortress Transportation and Infrastructure Investors LLC
- Freshpet, Inc.
- Gener8 Maritime, Inc.
- GoPro, Inc.
- GrubHub Inc.
- Houghton Mifflin Harcourt Company
- Inovalon Holdings, Inc.
- Intrawest Resorts Holdings, Inc.*
- James River Group Holdings, Ltd.
- Juno Therapeutics, Inc.
- Ladder Capital Corp
- LendingClub Corporation
- Natera, Inc.*
- Nimble Storage, Inc.
- NovoCure Limited**
- On Deck Capital, Inc.
- Parsley Energy, Inc.
- ProNAi Therapeutics, Inc.
- Pure Storage, Inc.*
- REGENXBIO Inc.*
- RSP Permian, Inc.
- Spark Therapeutics, Inc.*
- Square, Inc.
- Sunrun Inc.*
- Talmer Bancorp, Inc.
- Teladoc, Inc.
- Travelport Worldwide Limited
- TriNet Group, Inc.
- Twitter, Inc.*
- Virgin America Inc.*
- Zayo Group Holdings, Inc.
- zulily, inc.

* Excludes foreign private issuers, limited partnerships, REITs, trusts and blank check companies

** Davis Polk participated in the IPO
Significant Findings

Comparing our findings in this survey to those in our 2014, 2011 and 2009 surveys, we found widespread and generally increasing adoption of various takeover defenses at non-controlled companies in advance of their IPOs, at the same time seasoned public companies have been abandoning takeover defenses in the face of investor opposition and amid warnings by proxy advisory firms that they will scrutinize governance at IPO companies.

With respect to nearly all of the defensive measures we examined, our 2016 survey data revealed a higher prevalence of such measures today than in any of our earlier survey periods, namely:

- 98% of companies adopted a plurality vote standard for uncontested director elections.
- 96% of companies effectively prohibited shareholder action by written consent.
- 90% of companies adopted a classified board.
- 90% of companies required a supermajority shareholder vote for amending the bylaws.
- 86% of companies had provisions prohibiting shareholders from calling a special meeting.

We also found that the number of companies that adopted exclusive-forum provisions (another governance attribute disfavored by shareholder advocates) increased sixfold over the past several years, from 14% in the 2011 survey to 57% in the 2014 survey to 84% in the 2016 survey, in all likelihood reflecting developments in the Delaware General Corporation Law.

But not all developments will displease the corporate governance community. Our 2016 survey data demonstrated a continuing trend toward certain “shareholder-friendly” governance practices, particularly with respect to board and committee independence matters. For example, the average level of director independence was 73% of the board, roughly the same level or higher compared to our previous survey periods. The percentage of companies with fully independent audit, governance/nominating and compensation committees at the time of IPO also continued to trend upward in 2016—88% for both audit committees and compensation committees and 90% for governance/nominating committees.

Moreover, while only slightly more than half (56%) of the companies in the 2016 survey separated the roles of chairman and CEO, this separation has been on the rise in recent years, up from 34% in the 2011 survey. The number of companies with an independent chairman more than tripled to 32% in 2016 from 10% in 2009. And among the companies reviewed that did not have an independent chairman, the number with a lead director more than doubled to 44% in 2016 from 20% in 2009.
Primary Listing Exchange

Of 50 companies examined:

- **29** companies (58%) listed on the NYSE
- **21** companies (42%) listed on the NASDAQ

Classes of Outstanding Common Stock

Of 50 companies examined:

- **38** companies (76%) had one class of common stock outstanding
- **12** companies had two classes of common stock outstanding, **10** (20%) of which had unequal voting rights
**Board Size**

Of 50 companies examined:

- The average board size was 8 members
- The median board size was 7 members
- Board size ranged from 5 to 15 members

There was no distinct correlation between deal size and board size.

**Deal Size vs. Board Size**

**Level of Board Independence**

Of 50 companies examined:

- The average level of director independence was 73% of the board
- The median level of director independence was 75% of the board
- The level of director independence ranged from a low of 33% to a high of 91%

**Requirement for director independence at time of IPO**

An IPO company must have at least one independent director at the IPO in order to satisfy NYSE and NASDAQ audit committee listing standards. Subject to an exception for controlled companies, NYSE and NASDAQ standards require that the board of a listed company consist of a majority of independent directors within one year of the listing date.
Separation of Chairman and CEO

Of 50 companies examined:

- 28 companies (56%) had a separate chairman and CEO
- 16 companies (32%) had an independent chairman

Lead Director

Of 50 companies examined:

- 32 companies (64%) combined the roles of chairman and CEO or otherwise did not have an independent chairman
  - Of these, 14 companies (44%) had a lead director
Audit Committee Financial Experts

Of 50 companies examined:

- 39 companies (78%) had one financial expert
- 2 companies (4%) had two financial experts
- 3 companies (6%) had three financial experts
- 1 company (2%) had four financial experts
- 1 company (2%) had five financial experts
- 4 companies (8%) did not disclose a financial expert

Audit committee financial expert

The SEC requires a reporting company to disclose in its annual report (but not in its IPO prospectus) that the board has determined it has at least one audit committee financial expert, or explain why it does not.

An audit committee financial expert is a person who has the following attributes: (1) an understanding of generally accepted accounting principles and financial statements; (2) the ability to assess the general application of such principles in connection with the accounting for estimates, accruals and reserves; (3) experience preparing, auditing, analyzing or evaluating financial statements that present a breadth and level of complexity of accounting issues that are generally comparable to the breadth and complexity of issues that can reasonably be expected to be raised by the company's financial statements, or experience actively supervising one or more persons engaged in such activities; (4) an understanding of internal control over financial reporting; and (5) an understanding of audit committee functions.
Audit Committee Independence

Of 50 companies examined:*  
- 44 companies (88%) had a fully independent audit committee  
- 2 companies (4%) had a 4/5 independent audit committee  
- 3 companies (6%) had a 2/3 independent audit committee

Audit committee independence

Under NYSE and NASDAQ rules, an IPO company must have at least one independent audit committee member at the time of listing, at least a majority of independent members within 90 days of the effective date of its registration statement and a fully independent committee within one year of the effective date of its registration statement.

In addition to the NYSE/NASDAQ independence standards applicable to all independent directors, audit committee members are required to meet additional independence tests set forth by the SEC, which provide that a director who serves on the company’s audit committee may not (other than in his or her capacity as a member of the audit committee, the board or any other board committee): (1) accept any consulting, advisory or other compensatory fee from the company (excluding fixed, non-contingent payments under a retirement plan for prior service with the listed company); or (2) be an “affiliated person” of the company. In practice, the affiliated-person prohibition means that directors affiliated with large shareholders do not sit on the audit committee even though they may otherwise be deemed independent under stock exchange listing standards.
Governance/Nominating Committee Independence

Of 50 companies examined:*

- **45** companies (90%) had a fully independent governance/nominating committee
- **4** companies (8%) had a \( \frac{2}{3} \) independent governance/nominating committee

* 1 company did not disclose the composition of its governance/nominating committee
Compensation Committee Independence

Of 50 companies examined:*  
- 44 companies (88%) had a fully independent compensation committee  
- 5 companies (10%) had a ⅔ independent compensation committee

Governance/nominating and compensation committee independence

Under NYSE rules, a non-controlled IPO company must have at least one independent member on each of its governance/nominating and compensation committees by the earlier of the date the IPO closes or five business days from the listing date, at least a majority of independent members within 90 days of the listing date and fully independent governance/nominating and compensation committees within one year of the listing date. Under NASDAQ rules, a non-controlled IPO company must have at least one independent member on each of its governance/nominating and compensation committees at the time of listing, at least a majority of independent members within 90 days of the listing date and fully independent governance/nominating and compensation committees within one year of the listing date (though the company may also choose not to adopt a nomination committee and instead rely on a majority of the independent directors to discharge the attendant duties). Under both NYSE and NASDAQ rules, compensation committee independence must be considered under each of the general listing standard independence requirements for directors as well as the additional affiliate and compensatory fee independence considerations applicable to compensation committee members.
Additional Board Committees

Of 50 companies examined:

- 15 companies (30%) had additional board committees

The additional committees included risk committees, compliance committees, executive committees, finance and investment committees, research and development committees, science and technology committees, and disclosure committees, among others.

Shareholder Rights Plan (Poison Pill)

Of 50 companies examined, none had adopted a shareholder rights plan (poison pill). As discussed below, so long as a company has blank check preferred stock, a poison pill may be able to be adopted at a later time.

Adoption of a shareholder rights plan (poison pill)

A typical shareholder rights plan, or poison pill, grants the existing shareholders of a company (other than a hostile acquiror) the right to acquire a large number of newly issued shares of the company (and of the acquiror if the target company is not the surviving entity in the transaction) at a significant discount to fair market value, if the acquiror becomes an owner of more than a preset amount (typically 10-20%) of the target company’s stock without prior board approval. The board can elect to redeem the poison pill at a trivial amount (e.g., <$0.01) or deem the rights plan inapplicable to certain acquirors, with the result that any potential acquiror must negotiate with the board (or replace the board through a proxy contest) before it acquires a significant stake. This is because the cost to the potential acquiror of crossing the ownership threshold would be prohibitive if the shareholder rights plan were triggered. So long as “blank check” stock power is provided as described below, a shareholder rights plan can usually be adopted at a later time rather than at the IPO and, in most cases, shareholder rights plans typically are not adopted at the time of the IPO.
“Blank Check” Preferred Stock

Of 50 companies examined, all were authorized to issue “blank check” preferred stock.

Authority to Issue “Blank Check” Preferred Stock

A company may include in its authorized and unissued share capital a certain amount of undesignated preferred shares. The board is authorized to issue preferred shares in one or more series and to determine and fix the designations, voting powers, preferences and rights of such shares and any qualifications, limitations or restrictions on such shares. The existence of “blank check” preferred stock may allow the board to issue preferred stock with super voting, special approval, dividend or other rights or preferences on a discriminatory basis without a shareholder vote. This authority is often used as a protective mechanism in the context of a hostile take-over attempt by permitting the adoption of a shareholder rights plan (poison pill) at that time.
**Classified Board**

Of 50 companies examined:

- 45 companies (90%) had a classified board*
- 5 companies (10%) did not have a classified board

* Of these 45 companies, 3 companies (7%) had a springing staggered board (the board automatically becomes classified upon a significant shareholder or group ceasing to own or control the vote of a specified percentage of outstanding shares)

---

**Classified board**

The implementation of a classified board often serves as a protective mechanism in the context of a take-over by ensuring that a potential acquiror cannot simply replace an entire board at one time with a more pliant board. Typically, a staggered board is composed of three equally divided classes of directors, with each class elected in successive years. A classified board serves as a complement to the protections afforded by a shareholder rights plan (as discussed above), in that it forces a potential acquiror to conduct a proxy contest at the company’s annual shareholder meeting for two consecutive years (time it is not typically willing to wait, leading it to engage with the incumbent board) before it can take over the board and revoke the shareholder rights plan.
Director Removal for Cause Only

Of 50 companies examined:

- 45 companies (90%) allowed removal of a director for cause only

*These 45 companies included 6 companies (13%) whose provision allowing director removal only for cause was triggered when a significant shareholder or group ceased to own or control the vote of a specified percentage of outstanding shares.

Director removal for cause only

Director removal for cause is an automatic consequence of having a classified board under Delaware law, and is necessary to preserve the extended terms of those directors. Taken together, a classified board structure and a provision allowing director removal for cause only (as supplemented by restrictions on shareholder ability to act by written consent, as discussed below) serve as a protective mechanism in the context of a take-over by forcing a potential acquiror to conduct a proxy contest at the company's annual shareholder meeting for two consecutive years before it can take over the board.
Shareholder Ability to Call Special Meeting

Of 50 companies examined:

- **43** companies (86%) prohibited shareholders from calling a special meeting*
- **7** companies (14%) permitted shareholders to call a special meeting. Of these:
  - **3** companies (43%) permitted shareholders comprising at least 10% to call a special meeting**
  - **4** companies (57%) permitted shareholders comprising at least a majority to call a special meeting

* These 43 companies included 6 companies (14%) whose provision prohibiting shareholders from calling a special meeting was triggered when a significant shareholder or group ceased to own or control the vote of a specified percentage of outstanding shares

** Organized in jurisdictions where this is required under local law
Advance Notice Bylaws

Of 50 companies examined, all had bylaws setting forth notice and certain other requirements when a shareholder proposes business for shareholder consideration, including the nomination of a director for election.

Advance Notice Bylaws

Yes
100%
Shareholder Action by Written Consent

Of 50 companies examined:

- **45** companies (90%) prohibited shareholder action by written consent*
- **5** companies (10%) permitted shareholder action by written consent
  - Of these, **3** companies (60%) required written consent to be unanimous, effectively rendering the right moot

**Shareholder Action by Written Consent Permitted**

- Yes
- Yes, but right is effectively moot

* These 45 companies included 6 companies (13%) whose provision prohibiting shareholder action by written consent was triggered when a significant shareholder or group ceased to own or control the vote of a specified percentage of outstanding shares

**Shareholder voting restrictions**

Shareholder voting restrictions serve to limit shareholders from acting without board involvement and can serve to restrict the ability of a potential acquiror from taking control of the company without having to negotiate with the board.
Board Authority to Change Board Size

Of 50 companies examined:

- **49 companies (98%)** permitted the board to change the size of the board*

*Exception was a non-U.S. incorporated company

**Board Authority to Fill Vacancies on Board**

Of 50 companies examined, all permitted the board to fill vacancies on the board.
Voting in Uncontested Board Elections

Of 50 companies examined:

- 49 companies (98%) required a plurality standard for board elections
- 1 company (2%) required a majority standard for board elections*

* This company did not have a director resignation policy

Voting standard for director elections under Delaware law

Under Delaware law, in the absence of a different specification in a company’s certificate of incorporation or bylaws, directors are elected by a plurality voting system. Under a plurality voting system, the nominees for directorships are elected based on who receives the highest number of affirmative votes cast. Under a majority voting system, a nominee for directorship is elected if he or she receives the affirmative vote of a majority of the total votes cast for and against such nominee.
Supermajority Vote for Amending the Bylaws

Of 50 companies examined:

- **45** companies (90%) required a supermajority shareholder vote for amending the bylaws*
  - Of these, **12** companies (27%) required a vote of 75% or more
  - **5** companies (10%) did not require a supermajority shareholder vote for amending the bylaws

*These 45 companies included 5 companies (11%) whose supermajority vote requirements were triggered when a significant shareholder or group ceased to own or control the vote of a specified percentage of outstanding shares.
Exclusive-Forum Provisions

Of 50 companies examined:

- 42 companies (84%) had an exclusive-forum provision. Of these:
  - 38 companies (90%) specified Delaware as the exclusive forum
  - 30 companies (72%) adopted them in their charter, 11 companies (26%) adopted them in their bylaws and 1 company (2%) adopted them in both its charter and its bylaws
  - 8 companies (16%) did not have an exclusive-forum provision
**Compensation Consultants**

Of 50 companies examined:

- 12 companies (24%) disclosed the use of and named their compensation consultants

The specified consultants included:

- Compensation Advisory Partners, LLC
- Compensia, Inc.
- Frederic W. Cook & Co., Inc.
- McLagan, an Aon Hewitt company
- Pay Governance LLC
- Pearl Meyer & Partners, LLC
- Radford, an Aon Hewitt company
- Towers Watson & Co.

**Compensation Consultant Disclosure**

The SEC requires a listed company to disclose in its proxy statement any role of compensation consultants in determining or recommending the amount or form of executive and director compensation, identifying such consultants, stating whether such consultants are engaged directly by the compensation committee (or persons performing the equivalent functions) or any other person and describing the nature and scope of their assignment and the material elements of the instructions or directions given to the consultants with respect to the performance of their duties under the engagement.
New Equity Compensation Plan

Of 50 companies examined:

- **45 companies (90%)** adopted a new equity compensation plan. Of these:
  - **30 companies (67%)** adopted a new equity compensation plan with an evergreen provision
  - **19 companies (42%)** adopted a new equity compensation plan with a clawback provision
  - **9 companies (20%)** adopted a new equity compensation plan that permitted option/SAR repricing without shareholder approval
  - **1 company (2%)** had a stock ownership/retention requirement

### New Equity Compensation Plan (NECP)

- Yes 90%
- No 10%

### NECP with Evergreen Provision

- Yes 67%
- No 33%

### NECP with Clawback Provision

- Yes 42%
- No 58%
Employment and Similar Agreements

Of 50 companies examined:

- **26** companies (52%) adopted one or more employment or similar agreements
Equity Compensation Awards

Of 50 companies examined:

- The number of outstanding equity compensation awards at the time of the IPO, as a percentage of the fully diluted number of common shares post-IPO, ranged from 0% to 29%

- The number of outstanding equity compensation awards at the time of the IPO, combined with the number of shares reserved for issuance under the new equity compensation plan adopted, as a percentage of the fully diluted number of common shares post-IPO, ranged from 0% to 42%

- The number of shares reserved for issuance under the new equity compensation plan adopted, as a percentage of the fully diluted number of common shares post-IPO, ranged from 0% to 22%
Disclosure of Non-GAAP Financial Measures

Of 50 companies examined:

- **36** companies (72%) disclosed non-GAAP financial measures

Disclosed non-GAAP financial measures included EBITDA, Adjusted EBITDA, Adjusted EBITDAX, Adjusted EBITDA Margin, Adjusted Net Income, Free Cash Flow, Contribution Margin and Billings, among others.
Emerging Growth Companies

Of 50 companies examined, 41 companies (82%) identified themselves as emerging growth companies under the JOBS Act of 2012. Of these:

- 2 companies (5%) included less than one year of audited financial statements in the registration statement (due to their recent inception), 19 companies (46%) included two years of audited financial statements in the registration statement and 20 companies (49%) included three years of audited financial statements in the registration statement.

- 2 companies (5%) included less than one year of selected financial data in the registration statement (due to their recent inception), 17 companies (41%) included two years of selected financial data in the registration statement, 14 companies (34%) included three years of selected financial data in the registration statement, 4 companies (10%) included four years of selected financial data in the registration statement and 4 companies (10%) included five years of selected financial data in the registration statement.

- None included a Compensation Discussion and Analysis in the registration statement.

- 1 company (2%) took advantage of the ability to delay adopting newly applicable public-company accounting policies.
Emerging growth companies under the JOBS Act of 2012

The JOBS Act of 2012 eased the IPO process and subsequent reporting and compliance obligations for “emerging growth companies” and loosened restrictions on research around the IPO of an emerging growth company. Under the JOBS Act, emerging growth companies can take advantage of various reporting and compliance exemptions, including not being required to comply with the auditor attestation requirements of the Sarbanes-Oxley Act, reduced executive compensation disclosure requirements and the ability to delay adoption of new public-company accounting principles.

An emerging growth company is an IPO company that had annual gross revenues of less than $1 billion during its most recent fiscal year. An emerging growth company retains this status until the earliest of: (1) the last day of the first fiscal year during which its annual revenues reach $1 billion; (2) the last day of the fiscal year in which the fifth anniversary of its IPO occurs; (3) the date on which the company has, during the previous three-year period, issued more than $1 billion in non-convertible debt; and (4) the date on which the company becomes a “large accelerated filer” (essentially, a company with $700 million of public equity float that has been reporting for at least one year).

A company that filed for its IPO as an emerging growth company but subsequently lost this status before the IPO was completed will continue to be treated as an emerging growth company for one year or, if earlier, until completion of its IPO.
Davis Polk’s Capital Markets Practice

Davis Polk & Wardwell LLP’s capital markets practice provides a full range of services for issuers and underwriters in initial public offerings, follow-on offerings, investment-grade and high-yield debt issuances, and in the design and execution of sophisticated equity derivative products. Davis Polk is also an international IPO adviser that has advised companies, selling shareholders (including private equity and venture capital shareholders) and underwriters in connection with these transactions. Our global capital markets practice has approximately 240 lawyers, including 39 partners in our offices around the world.
