

The Affordable Clean Energy Rule and the Past, Present and Future of Climate Change Regulation of the U.S. Power Industry

January 8, 2019 | Articles & Books

Davis Polk counsel David Zilberberg authored “The Affordable Clean Energy Rule and the Past, Present and Future of Climate Change Regulation of the U.S. Power Industry” article for the *Fordham Environmental Law Review 2018*.

This article provides an overview of the CPP and ACE Rule, including a discussion of their history and key provisions, as well as a consideration of the possible future trajectory of federal climate change regulation of the power sector.
