

## Supreme Court Upholds Constitutionality of Inter Partes Review and Holds That Petitioners Are Entitled to a Written Decision Addressing All Challenged Claims

April 25, 2018 | Client Update

On April 24, the United States Supreme Court issued two opinions about the United States Patent and Trademark Office's ("USPTO") *inter partes* review procedure. First, it upheld the constitutionality of *inter partes* review, holding that a jury trial before an Article III court is not required to reconsider the grant of a patent. Second, it held that when conducting an *inter partes* review, the USPTO must issue a written decision addressing all challenged claims, rather than a narrower set of claims on which the USPTO might have instituted review. Both decisions collectively ensure that defendants in patent litigation and parties interested in challenging blocking patents retain a comparatively efficient way to challenge patent validity. Please read on for more details on each decision.
